

Roman armour by Evie L

What is it made out of?

The armour was made from very strong, heavy metal to help you not get hurt from but might get a little bruise.

How does it work?

The armour is so strong that when something or someone tries to hurt it would not hurt.

Advantages

The armour will help you if something tries to hurt you.

Disadvantages

The armour is very very heavy and will make you tired about in 10 15 minutes.
